### SAFETY DATA SHEET In accordance with Regulation Annex I to Commission Regulation 453/2010 DATE OF ISSUE 24 February 2015 UPDATED ON 24 Mar 2021

# **Bi axially oriented Polypropylene (BOPP)**

## 1.0 IDENTIFICATION OF THE SUBSTANCE AND OF THE COMPANY

1.1 Product identifier:				
<b>REACH Registration Number</b>	Not applicable.			
EC# & CAS#	Name of substance Polypropylene aluminium	<b>CAS</b> 9003-07-0 7429-90-5	EC Not available 231-072-3	
Trade Name:	FLEXOPP <sup>™</sup> & FLEXMETPROTECT <sup>™</sup>			
Synonym:	Bi axially oriented Polypropylene (BOPP)			
Chemical Name	Polypropylene and its Copolymer	r/Terpolymer/Aluminur	n metalized	
Chemical Formula	Propene Homo polymer, (C3H6)	n- (min.90%)		
Structural Formula	* $\sqrt{\frac{CH_3}{\int_n^{ht}}}$			
1.2 Relevant identified uses of t	he substance or mixture and us	es advised against		
Relevant identified uses:				
Flexible packaging applic	ation.			
Decorative application.				
Industrial application.				
Food packaging.				
Building protection.				
Cosmetic packaging.				
Uses advised against: No data	available.

## **SAFETY DATA SHEET**

### 5.2. Special hazards arising from the substance or mixture

Hazardous combustion products: Complete combustion with excess of oxygen foams: s carbon dioxide and water vapour.

### 5.3. Advice for fire-fighters

Stop the fire spreading, call the Fire brigade immediately, evacuate non-essential personal. Protective clothing's, goggles and self contained breathing equipment should be made available for fireman.

### Other information

Special Remarks on Fire Hazards         Wear suitable Self-contained breathing equipment in case of risk of experiments.	

### 6.0 ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1 For non-emergency personnel

### **Protective equipment:**

Avoid inhalation of dust and contact with skin and eyes. Wear appropriate personal protective equipment.

#### 6.1.2 For emergency responders

Remove ignition sources from the powdered grades. Keep away from heat or flame. Sweep up with a minimum of dusting. Collect in container, e.g. fiberboard drum or carton.

### 6.2 Environmental precautions:

Keep out of drains and water sources.

### 6.3 Methods and material for containment and cleaning up

#### 6.3.1 For containment:

Avoid dust formation. Collect dust using a vacuum cleaner equipped with HEPA filter. If not possible, gently moisten dust with water fog before it is collected with shovel, broom or the like. Flush area with water.

6.3.2 For cleaning up:

**Small Spill and Leak** Pellets on the floor could present a serious slipping problem. Good housekeeping must be maintained at all times to avoid this hazard. Sweep, shovel, or vacuum material into clean containers.

Large Spill and Leak Use a shovel to put the material into a convenient waste disposal container. Do not allow any potentially contaminated water with pellets to enter any waterway, sewer or drain.

### 6.3.3 Other Information:

No data available.

## **SAFETY DATA SHEET**

#### 6.4 Reference to other sections:

None

### 7.0 HANDLING AND STORAGE

### 7.1 Precautions for safe handling

#### **Protective measures:**

- Keep away from ignition sources.
- Observe the general rules of industrial fire protection.
- Keep the film at room temp. 24hrs.prior to processing.
- Keep original wrapping on the film until it is used. In case the roll is partially used, the balance roll should be preserved on the standard packing with sticker.
- Film rolls should be moved only with equipment designed for the purpose as film rolls and pallets are heavy. Film edges are sharp and may cause cuts/wounds, handle with most care.
- In most of the processes where there is a movement of film over metal roller, Static electrical charges develop on the film, which may provide source of ignition to flammable vapors and gases or may give static shock to operator. Avoid static buildup.

### Measures to prevent fire:

Keep away from sources of ignition - No smoking. Store in a cool, dry place out of direct sunlight. Ground container and transfer equipment to eliminate static electric sparks. Store away from incompatible materials.

### Measures to prevent aerosol and dust generation:

No data available.

Measures to protect the environment:

Keep out of drains and water sources.

### Advice on general occupational hygiene:

ADEQUATE PERSONAL PROTECTIVE EQUIPMENT INCLUDING GLOVES, IMPERVIOUS SLEEVES & APRONS & EYE & FACE SHIELDS SHOULD BE PROVIDED.

### 7.2 Conditions for safe storage, including any incompatibilities

### Technical measures and storage conditions:

- Does not require special storage conditions. It is recommended to store below 30 °C in order to avoid any deterioration of the film surface properties.
- Use both the films by FIFO system & it is advised to rotate the film stock.
- Shelf life: 3 months for bare film (FLEXOPP<sup>™</sup>) and metallized film (FLEXMETPROTECT<sup>™</sup>) from the date of dispatch.

#### Packaging materials:

Keep packages closed to prevent contamination.

### Requirements for storage rooms and vessels:

Same as mentioned above.

### Manufacturing Sites:

- 1) India: UFLEX LIMITED (Film Business), A-1, Sector-60, NOIDA 201 301, U.P. INDIA., Tel: +91 (120) 4002121, 3982121, Fax: +91 (120) 2580511, 2580003, E-Mail: enquiry@flexfilm.com

## **SAFETY DATA SHEET**

### 7.3. Specific end use(s)

Same as mentioned in section 1.2

### 8.0 EXPOSURE CONTROLS/PERSONAL PROTECTION

### 8.1 Control parameters

No data available.

### 8.2 Exposure controls

Personal protective equipment should be chosen according to the CEN standards and in discussion with the supplier of the personal protective equipment.

### 8.2.1. Occupational Exposure controls

Standard usage condition of material does not generate the dust particles.

### 8.2.2 Personal protection equipment:

Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. If user operations generate dust, fumes or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

### 8.2.2.1 Eye and face protection:

Normal eye protection practices should be used. If dusty conditions exist, chemical goggles are recommended.

#### 8.2.2.2 Skin protection:

If contact with hot molten material is possible, wear heat insulating and chemical proof gloves and clothes and face shield and goggles for eyes

#### Hand protection:

No protection is ordinarily required under normal conditions of use. It is a good industrial hygiene practice to minimize skin contact.

#### Other skin protection:

Slabs of film on the floor can be slippery. Exercise due care in areas where slippage can occur.

### 8.2.2.3 Respiratory protection:

In case of risk of exposure to dust, vapour or fumes generated by thermal decomposition of the material, it is recommended that a local exhaust system is placed above the converting equipment (hood) and the working area mu8st be properly ventilated.

### 8.2.2.4 Thermal hazards:

Wear appropriate thermal protective clothing, when necessary.

### 8.2.3 Environmental exposure controls:

Environmental manager must be informed of all major spillages.
