

F-LLP-M METALLIZED LIQUID PACKAGING FILM

Base polyester is one side Heat Sealable whereas other side is either Untreated or Corona Treated. F-LLP-M is a metallized BOPET film having excellent barrier metal bond strength properties. This film is metallized on a specially modified surface to provide an improved metal bond strength of greater than 600gm/25mm. This superior bond strength gives high laminate bond strength that prevents delamination after filling. This film is specially designed for liquid / paste packaging applications.

KEY FEATURES:

- High heat resistance
- High metal bond strength

APPLICATION:

- Liquid packaging
- Sandwich Lamination
- Pasteurization

STORAGE & HANDLING

FLEXMETPROTECTTM needs to be stored in a warehouse below 35°C (95°F) and should not be exposed to direct sunlight, bright light sources, or high humidity. If the material is stored in the recommended conditions, FLEXMETPROTECT™ is suitable for use within 180 days from the date of shipment.

FOOD CONTACT

FLEXMETPROTECT™ complies with EU and FDA regulations on plastic materials used for food grade application. Specific documents and SDS are available on request.
